

SENTRIGUARD[®]

FOR RETAIL LOCATIONS

Secure and auditable access for staff, after-hours deliveries & FM providers

SentriGuard is a unique key management system that allows approved users to gain quick access to keys by storing them at the point of need.

Trusted by globally recognised Retail, Banking, Security and Facilities Management companies across the UK and Europe, it offers a secure alternative to traditional keyholding.

FASTER RESPONSE TIMES

With keys stored on-site, your security provider can dispatch the nearest patrol without delay reducing the risk of loss from break-ins.

COMPLETE ACCESS CONTROL

Grant and revoke access remotely and view full access audit trail on the platform. The key detection feature will notify you when keys are not returned.

SECURE STAFF ACCESS

Eliminate reliance on individual key holders and reduce risks associated with staff carrying keys. No more delays to store openings.

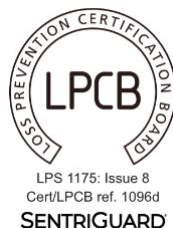

NO MORE LOCK REPLACEMENTS

In sectors with high staff turnover where keys are frequently lost or taken, SentriGuard helps prevent costly key and lock replacements.
